

JPE Replication Report

PUBLISHED
May 4, 2026

1 Paper Identification

ID	20240145
Author	Miller
Title	Who values democracy?
Iteration	3

Some useful information up front:

- [JPE Data and Code Availability Policy](#)
- [Step by step guidance from Data Editor for Authors](#)
- [Template README](#)

2 Summary

In assessing compliance with our [Data and Code Availability Policy](#), our reproducibility team has identified the following issues, which we ask you to address:

3 General

- ☐ Data Availability and Provenance Statements
 - ☐ Statement about Rights - Part 1: Right to use the data (e.g. *did the authors lawfully obtain the data*)
 - ☐ Statement about Rights - Part 2: Right to publish the data (e.g. *are human subjects involved and did permission been granted to publish their data?*)
 - ☒ License for Data (optional, but recommended)
 - ☒ Details on each Data Source
- ☒ Dataset list
- ☒ Computational requirements
 - ☒ Software Requirements
 - ☐ Controlled Randomness (as necessary)
 - ☒ Memory, Runtime, and Storage Requirements
- ☒ Description of programs/code
 - ☒ License for Code (Optional, but recommended)
- ☒ List of tables and programs
- ☐ References (Optional, but recommended)

4 High-level Description of Research Project

This research project...

- ☒ uses observational data.
- ☒ uses *confidential* observational data.
- ☐ uses data generated via experiment or trial by the authors (in field or lab).
 - ☐ For lab experiments: The code to implement the experimental protocol (z-Tree, o-Tree etc) is included in the package.
 - ☐ A PDF copy of IRB approval is contained in the package.
 - ☐ A PDF document outlining the design of the experiment, including information on the selection and eligibility of participants is included.
 - ☐ A PDF copy of the instructions given to participants in both original language and an English translation is included.
- ☐ uses data generated via survey by the authors (in field or online)
 - ☐ The programs used to administer the survey (e.g. qualtrics survey file) are included.
 - ☐ A PDF copy of IRB approval is contained in the package.
 - ☐ A PDF of the original questionnaire(s) and information on the selection and eligibility of participants is included.
- ☐ is a simulation study: the data are generated by an algorithm.

☐ is a numerical illustration: no data are used but code is used to produce illustrative output (tables, figures)

5 Data description

For any data that cannot be provided as part of the replication package, please provide the following information as part of the README.

{REQUIRED} Please specify how long the data will be preserved in the restricted-access location.

{REQUIRED} Please provide affirmation of support for replication checks. – As per the [JPE policy](#), “In cases where data cannot be published in an openly accessible trusted data repository like the JPE dataverse, authors who have requested an exemption to publish them at the time of first submission must commit to preserving the data and code for a period of no less than five years following the publication of the paper. They should also provide reasonable assistance to requests for clarification and replication.”

{REQUIRED} Please provide a codebook for the data. – The codebook should at a minimum describe the variables obtained from the data source, in a manner that will let others verify that they have obtained a substantially similar dataset if successfully obtaining access to the data.

5.1 Data Sources

Input data sources used to build the analysis data.

Data Source	Location	Dataset	Public	Private	Access Described	DOI / URL
Correlates of War (CoW)	datastore/raw/cow/	militarized_interstate_disputes/MIDB_4.2.csv	Yes	No	Yes	Yes
Correlates of War (CoW)	datastore/raw/cow/	militarized_interstate_disputes/MIDLOC1_2.0.csv	Yes	No	Yes	Yes
Correlates of War (CoW)	datastore/raw/cow/	wars/Inter-StateWarData_v4.0.dta	Yes	No	Yes	Yes
Correlates of War (CoW)	datastore/raw/cow/	wars/Extra-StateWarData_v4.0.dta	Yes	No	Yes	Yes
Correlates of War (CoW)	datastore/raw/cow/	wars/Intra-StateWarData_v4.1.dta	Yes	No	Yes	Yes

6 Requirements

- ☒ README is in TXT, MD, or PDF format
- ☒ README is accessible at the root of the package (not inside a folder)
- ☐ Title conforms to guidance (starts with “Data and Code for: Title of Paper” or “Code for: Title of Paper”, is properly capitalized)
- ☐ Authors (with affiliations) are listed in the same order as on the paper

{REQUIRED} Please review the title of the deposit as per our guidelines.

{REQUIRED} Please review authors and affiliations on the deposit. In general, they are the same, and in the same order, as for the manuscript; however, authors can deviate from that order.

6.1 Stated Requirements

“The code was last run on a 10-core Intel-based laptop with WindowsOS version 11 Enterprise with 50GB of free space. Computation took 21 minutes”

- ☒ Software Requirements specified as follows:
 - Python >=3.11, <3.13
 - Stata (code was last run with version 19)
- ☒ Computational Requirements specified as follows:
 - 2 GB - 25 GB required storage space
- ☒ Time Requirements specified as follows:
 - 10-60 minutes

7 Analyzing Data and Code Files

7.1 Potential Personal Identifiable Information (PII)

⚠ We found the following instances of potentially personally identifying information. This may be completely legitimate but might be worth checking. *As a reminder, privacy legislation in many countries (e.g. GDPR in EU) prohibits the dissemination of personal identifiable information without prior (and documented) consent of individuals.* If indeed you want to publish such information with your replication package, you should probably have obtained IRB approval for this – please check!

Summary: - Data files with PII indicators: 4037 - Variables flagged in data: 4226 - Code files with PII references: 295 - PII references in code: 17104

7.1.1 Summary of Flagged Files

File Type	File	Variables/References	PII Categories
Data	BEG0086AEU.csv	1	country

See [Appendix](#) for detailed listing of all flagged instances.

7.1.2 File Paths Report

Generated on 2026-04-24T09:56:37.960

Warning: Our search on file path types is imperfect and incurs both type 1 and type 2 errors. We aim to strike a reasonable balance between both. The below table is therefore only indicative. Detailed listings can be found in the appendix to this report.

In this table we analyse all files which contain source code (not data and documentation), and we report the grand total of each type of filepath we encountered.

Please check and replace any `windows` filepaths with unix compliant paths, insofar as this is possible in your setup. (Notice that `STATA` allows `/` to be a filepath separator on a windows platform, hence this is a requirement for *all* `STATA` applications.)

Files Analyzed	Windows Paths	Unix Paths	Mixed Paths	Drive Letters (<code>C:\</code> etc)
348	15	70	78	0

7.1.3 Duplicate Files Report

We found the following duplicate files:

Filename	Size (MB)	Checksum (MD5)

7.2 Code description

The author implements the replication using a SCons-based reproducible research pipeline, orchestrated through uv, which automatically runs the Python and Stata scripts needed to generate the paper’s tables and results.

There are 36 `.do` scripts which generate the analysis data.

There are 10 `.do` and 2 `.py` scripts which generate the main tables.

There are 7 `.do` and 1 `.py` scripts which generate the main figures.

There are 16 `.do` and 1 `.py` scripts which generate the appendix tables.

There are 11 `.do` scripts which generate the appendix figures.

SUM:	2755	16426	16541	357451

NOTE: In-text numbers that reference numbers in tables do not need to be listed. Only in-text numbers that correspond to no table or figure need to be listed.

7.3 Computing Environment of the Replicator

- Mac Laptop M2 MacBook Air, MacOS 15.7.4, 16 GB of memory, (M2 Processor, 8 cores)
- JupyterLab 4.4.4 + R 4.5.1 + Julia 1.11.6 + StataNow 19.5

8 Replication

Replication proceeds as follows:

```
(miller_env) nuvolos@nuvolos:cp .env.example .env
(miller_env) nuvolos@nuvolos:sed -i "s|ROOT_PATH=.*|ROOT_PATH=$(pwd)|" .env
(miller_env) nuvolos@nuvolos:sed -i "s|DATASTORE_PATH=.*|DATASTORE_PATH=$(pwd)/datastore|" .env
(miller_env) nuvolos@nuvolos:sed -i "s|# JMSLAB_EXE_STATA=stata-mp|JMSLAB_EXE_STATA=stata-mp|" .env
(miller_env) nuvolos@nuvolos:/files/JPE-Miller-20240145/replication-package/democracy$ uv sync
bash: uv: command not found
```

README does not provide instructions to download the

```
(miller_env) nuvolos@nuvolos:curl -LsSf https://astral.sh/uv/install.sh | sh
(miller_env) nuvolos@nuvolos:source $HOME/.local/bin/env
(miller_env) nuvolos@nuvolos:uv sync
(miller_env) nuvolos@nuvolos:uv run python -m SCons -c
(miller_env) nuvolos@nuvolos:uv run python -m SCons
```

The replication runs and produces tables and figures. The code breaks along the way due to uninstalled dependencies. The corresponding error messages are not included for the sake of space. The uninstalled dependencies are specified in the [Findings]{#sec-findings} section.

9 Findings

- The following README edits, recommended from R1 and R2 replication checks, remain un-addressed:
 - README title naming convention + names and affiliations
 - Data and availability statements, and Provenance statements
- The instructions do not include a step to download the uv package.
- The code breaks along the way due to uninstalled STATA packages, notably:
 - `ssc install carryforward gtools asreg texdoc`
 - `net install _gwtmean, from(http://fmwww.bc.edu/RePEc/bocode/\_)`
- The code produces tables and figures but cannot reproduce the manuscript.
 - The latter requires the pdflatex package which cannot be downloaded on the replicators cloud computing setup - there is no `sudo` access on Nuvolos.

Replicator recommends:

- Renaming the README as per the JPE README naming convention. That is "Data and Code for: Title of Paper" or "Code for: Title of Paper".
- Adding author name and affiliations to the README title - as per the JPE naming convention.
- Including an explicit section for the Data Availability and Provenance Statements. Notably the Statement About Rights Part 1 and Statement About Rights Part 2.
- Fixing the code generating Figure 7 s.t. the x-axis does not include '?'.
- Adding `carryforward gtools asreg texdoc` and `_gwtmean` to the dependencies.
- In the the "Setup" section, adding an intermediary step between 4 and 5 to install `uv`, should it be necessary.

9.1 Data Preparation Code

Aside from the previously mentioned breaks, the code ran smoothly.

9.2 Tables and Figures

- All tables from the manuscript and appendix were reproduced with no discrepancies.
- All figures from the manuscript were reproduced with the following minor discrepancy:
 - table 7 x-axis reads '?' instead of '-'.

9.3 In-Text Numbers

- ☒ In-text numbers not verified.
- ☐ There are no in-text numbers, or all in-text numbers stem from tables and figures.

- ☐ There are in-text numbers, but they are not identified in the code

10 Classification

- ☐ full reproduction
- ☐ full reproduction with minor issues
- ☒ partial reproduction (see above)
- ☐ not able to reproduce most or all of the results (reasons see above)

10.1 Reason for incomplete reproducibility

- ☐ None.
- ☐ **Discrepancy in output** (either figures or numbers in tables or text differ)
- ☒ **Bugs in code** that were fixable by the replicator (but should be fixed in the final deposit)
- ☐ **Code missing**, in particular if it prevented the replicator from completing the reproducibility check
 - ☐ **Data preparation code missing** should be checked if the code missing seems to be data preparation code
- ☐ **Code not functional** is more severe than a simple bug: it prevented the replicator from completing the reproducibility check
- ☐ **Software not available to replicator** may happen for a variety of reasons, but in particular (a) when the software is commercial, and the replicator does not have access to a licensed copy, or (b) the software is open-source, but a specific version required to conduct the reproducibility check is not available.
- ☐ **Insufficient time available to replicator** is applicable when (a) running the code would take weeks or more (b) running the code might take less time if sufficient compute resources were to be brought to bear, but no such resources can be accessed in a timely fashion (c) the replication package is very complex, and following all (manual and scripted) steps would take too long.
- ☐ **Data missing** is marked when data *should* be available, but was erroneously not provided, or is not accessible via the procedures described in the replication package
- ☐ **Data not available** is marked when data requires additional access steps, for instance purchase or application procedure.
- ☐ **Missing README** is marked if there is no README to guide the replicator, or the README is not in compliance with JPE requirements
